Phone: by request
www.linkedin.com/in/alliekeats

Creative software engineer focused on low-level systems. Strives to write code that runs fast and is memory-efficient, but is easy for the whole team to use and understand. Enjoys debugging and learning about the next big problem.

Experience

Behaviour Interactive — Montreal, QC Canada

Senior Systems Programmer II — Nov 2025 - Present

- Owner and creator of critical game systems on an unannounced UE5 project including itemization and inventory, save game serialization and versioning, player progression, enemy encounter spawning, streaming world persistence, and multiplayer loading flow
- Handling profiling and optimizing memory and CPU performance across Gen 9 and PC
- Owned the integration of several external technologies on Meet Your Maker (including AudioKinetic Wwise and AMD FidelityFX Super Resolution)

Senior Systems Programmer I — Dec 2022 - Oct 2025
Systems Programmer — Nov 2021 - Nov 2022
Network Programming Intern — May 2017 - Aug 2017

Vicarious Visions / Blizzard Entertainment — Albany, NY USA

Software Engineer — Jul 2020 - Oct 2021

- Member of the systems expertise group with a focus on performance
- Authored core components for Diablo II: Resurrected's proprietary engine including the C++17 job system, file streamer, and render graph. Also owned the "Translation Layer" system which remapped events and information from the underlying 2D game into 3D
- Prior projects include Destiny 2: Foresaken and support on Call of Duty: Black Ops 4

Associate Software Engineer — Mar 2019 - Jul 2020
Junior Software Engineer — Jun 2018 - Mar 2019

Emergent Media Center — Burlington, VT USA

Platform Programming Intern/Co-op — Sep 2017 - May 2018

- Solved gameplay tasks for projects using the Xbox Kinect 2, Oculus Rift, and HTC Vive
- Lead the mobile optimization effort for BREAKAWAY, a Unity game targeting low-end Android devices
- Assisted on an interactive art project currently installed in Burlington Airport

Moment Factory — Montreal, QC Canada

Creative Developer Intern — Jan 2017 - Apr 2017

- Developed gamified experiences with the Interactif Team while partnered with other interns and full-time team members to build Unity and TouchDesigner prototypes
- Completed tasks involving gameplay and network programming

Education

Game Programming, BS

Champlain College

Burlington, VT USA
Aug 2014 - May 2018

Completed solo and team projects, including PC, mobile, and VR games. Studied abroad in Montreal (Jan-May 2017). Experience as a gameplay, AI, network, and tools programmer.

Selected coursework:

- Vectors & 3D Math
- OpenGL Programming
- Game Architecture
- AI for Games
- Networking for Games
- Artificial Opponents
